In addition to the software products, vendor will provide training for end users and "consulting services," which will cover implementation support, system customizations, data transfer configurations, and project management.

OUTCOMES:

The acquisition of this system will establish a "one stop shop" tool for ILP completion, college and career planning, and reporting on the KPI data associated with these activities, such as the percent of seniors submitting one application to a "match" postsecondary institution. Students will have the resources required to conduct highly organized and effective postsecondary planning and educators and administrators have the tools to track individual student and school progress in postsecondary preparation. The data collection, analysis, and reporting function provided by the system will not only allow practitioners to go about their required reporting tasks more efficiently, it can drive improved postsecondary outcomes for students by facilitating a more sophisticated analysis of the correlations between student profiles, postsecondary planning actions, and outcomes.

Additionally, considering the fact that nearly sixty (60) high schools in the district currently purchase Naviance products individually at prices much higher than we are able to secure through this contract, the Board will be swapping out an inefficient spend for one that returns more value and utilizes the scale of the district to obtain a better per student price for the products and services that support college and career planning and its correspondent data reporting.

COMPENSATION:

Vendor shall be paid as follows:

Estimated annual costs for the three (3) year term are set forth below:

\$900,000.00, FY16

\$900,000.00, FY17
